

# ABOUT EMBER

A slow burn. A quiet spark.

With **Ember**, we introduces a collection rooted in contrast – where deep shades of black, earthy brown, and emerald green meet the soft glint of metallic studs. Every piece is designed to evoke a sense of quiet strength: feminine, but with an edge.

Inspired by the ember's glow – warm, controlled, but always ready to ignite – this collection celebrates subtle power. The materials are rich, the textures layered, the details precise. Nothing shouts, everything resonates.

Ember is made for the woman who commands attention without needing to ask for it.
